Abstract (Basic): SU 1796188 A

Every other day the patient is given a bath contg. a decoction of the following herbs (g/l. of water) origanum (10-20), celandine (30-40), calendula (10-20), peppermint (80-120), burdock root (35-45), elecampene (35-45), artemisia (30-40), horsetail (30-40), medicinal sage (10-20), burr marigold (35-45), St. John's wort (30-40), sweet flag root (30-40), yarrow (35-45), daisy (10-20). The course consists of 10-15 procedures of 10-15 min. duration. At the same time an oil extract from a mixt. of equal pts. of the first 5 herbs is applied each day to the affected areas.

In trials clinical remission was achieved in 72% of neurodermatitis cases, with some improvement being noted in 12.3% and significant improvement in a further 15.7%.

USE/ADVANTAGE - For treating neurodermatitis in children. Clinical remission is attained in 72% of cases. Cuts in therapy periods and complication frequency can be achieved.
